

PRESS RELEASE

Courses on Simplified Technical English, Specification ASD-STE100

THE INTERNATIONAL TELEMATIC UNIVERSITY UNINETTUNO FOR THE VOCATIONAL TRAINING OF AEROSPACE, DEFENCE AND SECURITY TECHNICAL STAFF

Rome, the 10th November, launch of UNINETTUNO and ASD course, AeroSpace and Defence Industries Association, on the specific Simplified Technical English, ASD-STE100 aimed at training technical authors for the aerospace or high technology industry who are directly involved in preparing technical documentation in the English language.

The distance training course will be delivered on UNINETTUNO e-learning platform and will be certified by UNINETTUNO jointly with ASD.

UNINETTUNO was entrusted the task of training on the principles and use of this controlled language which is mostly applied in fields of the defence, security and aerospace industry at European as well as at international level with the purpose of enhancing worldwide security and exchange of information included in English-written operational and maintenance documentations.

UNINETTUNO supplies educational models, software packages and e-learning platform; ASD supports the development of contents based on the latest STE100 specification release.

The course will include 10 hours of video lesson delivered by a teacher who is member of the Simplified Technical English Maintenance Group and will also rely on tutors expert in the field.

It will be possible to enrol in this course any time of the year and follow the lessons from anywhere in the world thanks to the distance delivery mode; the course lasts 4 weeks and the first 5 enrolled students will receive a scholarship.

Upon course completion the participants will be awarded the ASD-STE100 certification, a requirement that will be essential to work in all fields of the high-technology industry and in international environments.
